

7 bit flow

This challenge is creative and I learned something new. On the top left corner, you can see something

Its mostly red. At first, this challenge made me read a whole research paper because I find something related to 7bit and cryptography.

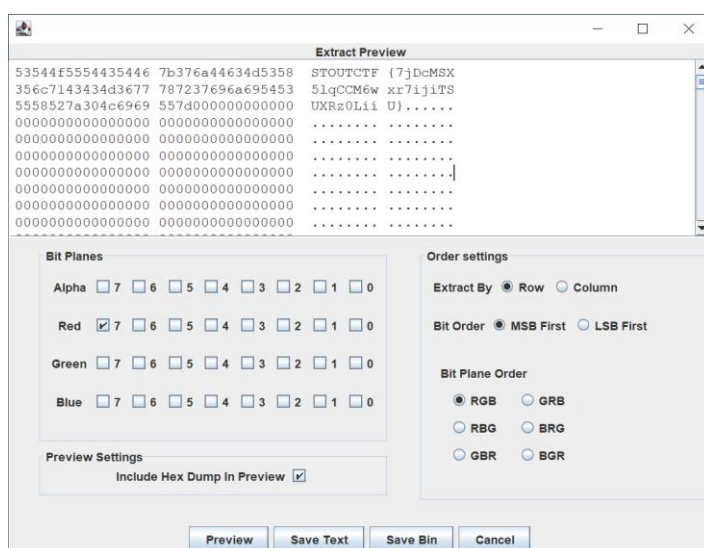

<https://ijcsmc.com/docs/papers/May2014/V3I5201499a94.pdf>

After hours of depression, I play around with stegsolve because the tools can extract bit layer (data extract feature)

<https://github.com/zardus/ctf-tools/blob/master/stegsolve/install>

Check all the 7 bit boxes cant get the flag. Notice the redness in the picture? Just tick the 7th red box and got the flag bruh.
